

## How to Install an Elevator

Before installation:

1. Prepare the knot

2. Tighten the knot

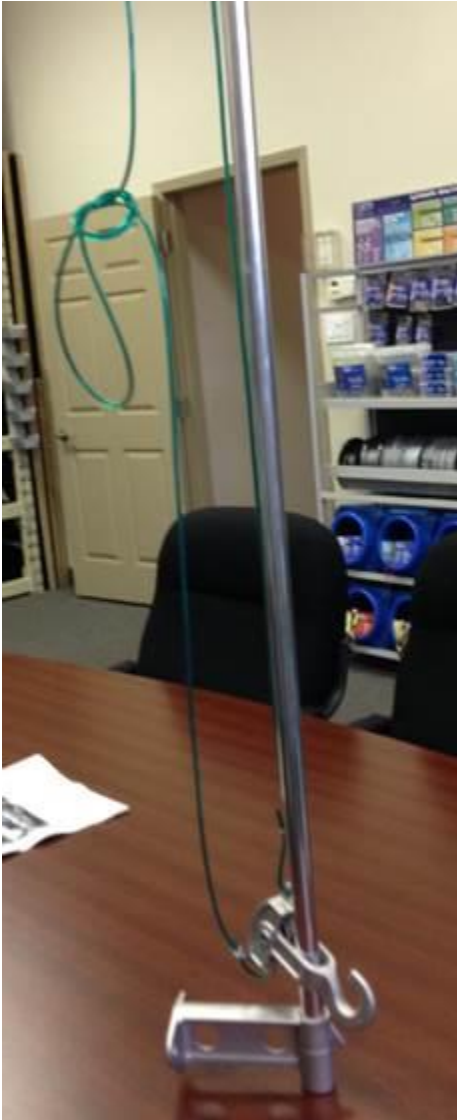

3. Put the knot on the hook if you want the pulley to hold up.

This is what it looks like when the knot is on the hook:

This is what it looks like when the pulley is down:

Installation of the elevator:

1. With a drill, make a hole in your post. Use a smaller bit than the hook.
2. Screw the hook in the hole. Keep the hook up.
3. Put the pulley on the hook.
4. Repeat steps 1 to 3 for the other side (MAKE SURE THAT THE PULLEYS ARE AT THE SAME HEIGHT FOR OPTIMAL RESULTS).
5. Install the clothesline by making sure that the two parts you need to put in the winch are on the top.
6. Insert the clothesline in the winch and tie.
7. Cut the part you do not need.
